- tsedey1993@gmail.com

## EDUCATION

**Bachelor of Science**  
Software Engineering  
**Currently enrolled in:** Addis Ababa Science and Technology University, Addis Ababa, Ethiopia.

**OBJECTIVE**  
seeking a challenging career in software development with a progressive organization where I can utilize my technical skills and abilities.

## TECHNICAL SKILLS

## EXPERIENCE

### Apr 2024

Final year project

- developed a face recognition attendance system as part of our final project. The backend was implemented using Python, and we used a Convolutional Neural Network (CNN) model for the face recognition training. The frontend was built with React.

### FEB 2024

Internship at TechVille Technology:

- Served as a Project Manager and Backend Developer.
- Demonstrated strong project management abilities and technical expertise.

### SEP 2022 - APR 2023

Internship at MSS Company:

- Developed tender platform to streamline procurement process and enhance bidding efficiency.
- Utilized React and Laravel for frontend and backend development.
- Contributed to platform design and implementation, showcasing teamwork and technical skills.

### JUL 2024 - SEP 2024

- Developed Android attendance app for college, enabling efficient monitoring of student presence and permissions.
- Co-led smart digital school bell project, automating end-of-period alerts and displaying class information.

### 2021-2022

- Created Mysteria Restaurant website with PHP, HTML, CSS, and JavaScript. Features menu, location, online ordering, delivery, and reservations.
- Developed Java-based Airplane Ticket Reservation System with GUI.
